ICE/CON/Q1501-SI002: MEP Executive

Brief Job Description

The MEP Executive provides essential support in the installation, maintenance and repair of Mechanical, Electrical and Plumbing (MEP) systems. This role involves assisting MEP technicians and engineers with various tasks, including reading blueprints, handling tools, performing basic installations and troubleshooting minor issues in line with sector-specific standards. The individual collaborates with other teams on-site or within facilities to ensure MEP systems operate efficiently, safely and in compliance with industry codes and standards.

Personal Attributes

The individual should be physically fit and mentally alert. The person should have problem-solving, coordination and appropriate verbal and written communication skills.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. ICE/CON/N1523: Identify Tools, Equipment and Materials Relevant to MEP Work at a Construction Site
2. ICE/CON/N1524: Read and interpret MEP system Drawings and Specifications
3. ICE/CON/N9901: Implement Safe Work Practices and Environmental Stewardship at Construction Sites
4. DGT/VSQ/N0101: Employability Skills (30 Hours)

Electives*(mandatory to select at least one):*

Elective : Electrical Systems

1. ICE/CON/N1519: Assist in Electrical Wiring Low Voltage (LV) Installations and Earthing systems
2. ICE/CON/N1520: Assist in Installation, Repair and Maintenance of Electrical Systems

Qualification Pack

ICE/CON/N1523: Identify Tools, Equipment and Materials Relevant to MEP Work at a Construction Site

Description

This NOS defines the skills and knowledge required to identify, verify and handle tools, equipment and materials used in Mechanical, Electrical and Plumbing (MEP) work at construction sites, ensuring readiness for installation, operation and safe usage under supervision.

Scope

The scope covers the following :

- Identify Tools and Equipment for MEP Task
- Identify Materials Used in MEP Works
- Follow Safety and Storage Procedures for MEP Tools & Materials

Elements and Performance Criteria

Identify Tools and Equipment for MEP Tasks

To be competent, the user/individual on the job must be able to:

PC1. identify commonly used hand tools for mechanical works such as spanners, pliers, pipe wrenches, threading tools and cutters.

PC2. identify electrical tools including testers, multimeters, screwdrivers, crimping tools, cable cutters, and insulation tools.

PC3. identify plumbing tools such as pipe wrenches, PVC/CPVC cutters, threaders, pipe benders, and jointing equipment.

PC4. identify power tools relevant to MEP works, including drills, grinders, hydraulic benders, and cable pulling machines.

PC5. identify lifting and shifting equipment used for MEP material handling such as chain blocks, trolleys, pulleys and scaffolds.

PC6. verify the suitability of tools and equipment as per the assigned task and work method statements.

PC7. check tools and equipment for damage, defects or missing components before use.

PC8. ensure that tools and equipment are calibrated, labelled and maintained as per manufacturer’s guidelines.

Identify Materials Used in MEP Works

To be competent, the user/individual on the job must be able to:

PC9. identify commonly used mechanical materials such as ducts, GI sheets, insulation material, fasteners and hangers.

PC10. identify electrical materials including cables, conduits, DBS, switches, sockets, MCCB, and earthing components.

PC11. identify plumbing materials such as pipes (PVC, CPVC, PPR, GI, HDPE), fittings, valves, sealants, and tapes.

PC12. understand the size, type and specification of MEP materials as per drawings and BOQs.

PC13. differentiate between approved materials and rejected/damaged materials.

PC14. follow colour coding, rating and identification markings on electrical and mechanical materials.

Element 3: Follow Safety and Storage Procedures for MEP Tools & Materials

To be competent, the user/individual on the job must be able to:

PC15. follow safe storage practices for electrical, mechanical and plumbing materials to avoid damage.

PC16. store tools and equipment in designated areas as per site protocols.

PC17. use PPE such as gloves, goggles, helmet, reflective jacket and safety shoes while handling MEP materials.

PC18. follow correct lifting techniques and manual handling procedures.

PC19. report any unsafe conditions, damaged tools, or missing materials to the supervisor.

PC20. ensure compliance with site EHS guidelines while identifying or retrieving tools/materials.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. company policies for tools and material handling.

KU2. standard operating procedures and work method statements for MEP tasks.

KU3. storage guidelines for MEP tools and materials.

KU4. safety protocols and EHS policies at construction sites.

KU5. types of wrenches, spanners, pliers, bolt cutters, threading tools and measurement tools.

KU6. power tools such as drills, grinders, benders and cutting machines.

KU7. use and interpretation of multimeters, testers, crimping tools, soldering guns, etc.

KU8. identification of electrical materials: wires, cables, conduits, DBs, MCBs, earthing strips.

KU9. types of pipe cutters, threaders, PPR welding machines and jointing tools.

KU10. KU10. materials such as pipes, fittings, valves, clamps, sealants and tapes.

KU11. colour codes, ratings, gauge and specification readings.

KU12. lifting and shifting tools such as trolleys, scaffolds, chain pulleys and hoists.

KU13. basic reading of site drawings to identify material specifications.

KU14. manufacturer guidelines for tool usage and maintenance.

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. ability to communicate material and tool requirements to supervisors.

GS2. ability to read basic labels, markings and safety notices.

GS3. ability to understand sizes, dimensions, gauges and ratings.

GS4. ability to compare specifications against drawings/BOQs.

GS5. respond to damaged tools/material issues.

GS6. identify mismatches in tools/material specifications.
GS7. ability to work safely under minimal supervision.
GS8. follow proper PPE and handling guidelines.

ICE/CON/N1524: Read and interpret MEP system Drawings and Specifications

Description

This NOS covers the ability to read, interpret and apply mechanical, electrical and plumbing (MEP) system drawings, layouts, schematics, legends and technical specifications for installation and site execution work. The job requires strong understanding of MEP symbols, technical standards and interpretation of BOQs, shop drawings, GFC (Good for Construction) drawings and other relevant documentation.

Scope

The scope covers the following :

- Interpret Mechanical (HVAC & Fire-Fighting) Drawings
- Interpret Electrical Drawings & Specifications
- Interpret Plumbing & Public Health Engineering Drawings
- Refer to BOQs, Specifications & Standards
- Apply Drawing Interpretation in Site Execution

Elements and Performance Criteria

Interpret Mechanical (HVAC & Fire-Fighting) Drawings

To be competent, the user/individual on the job must be able to:

PC1. identify symbols, line types and notations used in HVAC, fire-fighting and mechanical drawings.

PC2. interpret duct routing, pipe routing, equipment layout and mounting locations.

PC3. read duct sizes, pipe diameters, insulation details and damper/joint specifications.

PC4. interpret mechanical schedules such as airflows, pump heads, equipment capacities and material specifications.

PC5. interpret coordination drawings including MEP clearance zones and ceiling space planning.

PC6. verify drawing information such as elevations, section IDs and reference levels.

Interpret Electrical Drawings & Specifications

To be competent, the user/individual on the job must be able to:

PC7. identify symbols for electrical equipment, lighting, wiring, switches, control systems and earthing.

PC8. interpret cable routing, conduit layouts, DB (Distribution Board) schedules and panel diagrams.

PC9. read cable sizes, circuit ratings, breaker capacities and load details.

PC10. interpret SLD (Single Line Diagram) and schematics for power distribution.

PC11. understand electrical layouts such as lighting, power socket, low voltage, CCTV and fire alarm systems.

PC12. verify technical compliance with electrical specifications and codes.

Interpret Plumbing & Public Health Engineering Drawings

To be competent, the user/individual on the job must be able to:

PC13. identify plumbing symbols for water supply, drainage, stormwater and sanitary systems.

PC14. interpret pipe routing, pipe sizes, slope, invert levels and fixture locations.

PC15. read valve charts, pump schedules, manhole details and plumbing equipment layouts.

PC16. understand water tank details, pump room layouts, STP/ETP system drawings and pipe connections.

Refer to BOQs, Specifications & Standards

To be competent, the user/individual on the job must be able to:

PC17. interpret BOQ items, material specifications and measurement units.

PC18. verify drawing details with project technical specifications.

PC19. refer to IS/NBC standards where required.

PC20. report discrepancies between drawings and site conditions.

Apply Drawing Interpretation in Site Execution

To be competent, the user/individual on the job must be able to:

PC21. mark reference points and routing based on drawing interpretation.

PC22. assist in setting out MEP installations as per drawing levels and elevations.

PC23. verify that installed equipment, ducts, cables, conduits and pipes match drawing specifications.

PC24. maintain updated drawing revisions and follow GFC drawings.

PC25. communicate drawing-related issues to supervisors and engineers.

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. company policies for document control and drawing management.

KU2. procedures for obtaining latest revisions of drawings.

KU3. work method statements related to MEP installation.

KU4. roles and responsibility of design, QA/QC and site teams.

KU5. HVAC ducting symbols, pipe symbols, diffuser/grille nomenclature.

KU6. firefighting system symbols for sprinklers, hydrants, hose reels, pumps etc.

KU7. duct/pipe sizing concepts, insulation thickness, supports and hangers.

KU8. mechanical equipment: AHUs, FCUs, VRF, pumps, compressors, cooling towers.

KU9. electrical symbols, cable codes, panel diagrams.

KU10. SLD, schematic diagrams, distribution board layouts.

KU11. understanding of lux levels, load distribution and earthing systems.

KU12. PHE system symbols, pipe materials (CPVC, PPR, GI, HDPE).

KU13. drainage slope terminology, invert levels, venting systems.

KU14. pump room and STP/ETP equipment details.

KU15. interpretation of scales, levels, elevations and cross sections.

KU16. reading GFC and As-Built drawings.

KU17. understanding of reference grids and datum levels.

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. ability to communicate material and tool requirements to supervisors.
GS2. ability to read basic labels, markings and safety notices.
GS3. ability to understand sizes, dimensions, gauges and ratings.
GS4. ability to compare specifications against drawings/BOQs.
GS5. respond to damaged tools/material issues.
GS6. identify mismatches in tools/material specifications.
GS7. ability to work safely under minimal supervision.
GS8. follow proper PPE and Handling guidelines

ICE/CON/N9901: Implement Safe Work Practices and Environmental Stewardship at Construction Sites

Description

This NOS focuses on enabling construction workers and supervisors to actively adopt safe work practices, promote environmental stewardship and ensure a hazard-free workplace through proactive risk management, sustainable resource usage and timely emergency response.

Scope

The scope covers the following :

- Conduct workplace safety inspections
- Apply safe operational practices
- Promote health, hygiene, and well-being
- Implement sustainability and environmental conservation measures
- Respond effectively to onsite emergencies

Elements and Performance Criteria

Conduct Workplace Safety Inspections

To be competent, the user/individual on the job must be able to:

PC1. identify unsafe conditions such as improper scaffolding, poor lighting, open edges or obstructed pathways

PC2. assess task-specific risks involving tools, machinery, and hazardous materials

PC3. document safety observations and communicate them to the safety lead or supervisor

PC4. verify that safety controls such as guard rails, signages and access controls are in place

Apply Safe Operational Practices

To be competent, the user/individual on the job must be able to:

PC5. use appropriate PPE and ensure correct fit before beginning any activity

PC6. follow safe operation procedures for cutting, lifting, mixing and power tools

PC7. implement ergonomic practices to reduce fatigue and prevent musculoskeletal injuries

PC8. maintain housekeeping standards by ensuring clean and clutter-free work areas

Promote Health, Hygiene and Well-Being

To be competent, the user/individual on the job must be able to:

PC9. follow personal hygiene practices such as handwashing, clean clothing and proper hydration

PC10. identify signs of health issues such as heat stress, dehydration and respiratory discomfort

PC11. ensure availability and safe usage of sanitation facilities, drinking water and resting zones

PC12. report workplace illnesses or physical discomfort to the assigned authority

Implement Sustainability and Environmental Conservation Measures

To be competent, the user/individual on the job must be able to:

PC13. follow procedures for safe storage and controlled use of chemicals, fuels and hazardous substances

PC14. practice material conservation by preventing spillage, wastage and improper handling
PC15. undertake waste segregation for recyclable, non-recyclable and hazardous waste
PC16. support measures for dust suppression, noise control and energy/water conservation

Respond Effectively to Onsite Emergencies

To be competent, the user/individual on the job must be able to:

PC17. identify emergency alarms, muster points and evacuation routes
PC18. use basic firefighting equipment such as extinguishers, fire blankets and sand buckets where appropriate
PC19. assist in basic first-aid procedures including bleeding control, CPR and heat-stroke management
PC20. support emergency communication protocols and follow command instructions

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. workplace safety policies, EHS manuals and site-specific procedures
KU2. roles of safety personnel, supervisors and emergency response teams
KU3. documentation formats for safety reporting and compliance
KU4. internal escalation protocols for hazardous conditions or incidents
KU5. legal obligations related to occupational safety and environmental protection
KU6. types of workplace hazards chemical, physical, electrical, ergonomic and environmental
KU7. safe handling techniques for construction materials, tools and machinery
KU8. principles of PPE selection, inspection and maintenance
KU9. basics of first aid, CPR and firefighting methods
KU10. environmental management practices including waste reduction and pollution control
KU11. measures for heat-stress prevention, hydration management and fatigue control
KU12. ergonomics and safe manual handling techniques

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. read and interpret safety signage, manuals and instructions
GS2. communicate safety findings and concerns clearly to team members
GS3. maintain basic documentation and reports for safety audits
GS4. use problem-solving skills to manage minor hazards or disruptions
GS5. collaborate effectively during drills, emergency situations and environmental initiatives
GS6. demonstrate awareness and discipline in following safe work practices consistently

DGT/VSQ/N0101: Employability Skills (30 Hours)

Description

This unit is about employability skills, Constitutional values, becoming a professional in the 21st Century, digital, financial, and legal literacy, diversity and Inclusion, English and communication skills, customer service, entrepreneurship, and apprenticeship, getting ready for jobs and career development.

Scope

The scope covers the following :

- Introduction to Employability Skills
- Constitutional values - Citizenship
- Becoming a Professional in the 21st Century
- Basic English Skills
- Communication Skills
- Diversity & Inclusion
- Financial and Legal Literacy
- Essential Digital Skills
- Entrepreneurship
- Customer Service
- Getting ready for Apprenticeship & Jobs

Elements and Performance Criteria

Introduction to Employability Skills

To be competent, the user/individual on the job must be able to:

PC1. understand the significance of employability skills in meeting the job requirements

Constitutional values – Citizenship

To be competent, the user/individual on the job must be able to:

PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices

Becoming a Professional in the 21st Century

To be competent, the user/individual on the job must be able to:

PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.

Basic English Skills

To be competent, the user/individual on the job must be able to:

PC4. speak with others using some basic English phrases or sentences

Communication Skills

To be competent, the user/individual on the job must be able to:

PC5. follow good manners while communicating with others

PC6. work with others in a team

Diversity & Inclusion

To be competent, the user/individual on the job must be able to:

PC7. communicate and behave appropriately with all genders and PwD

PC8. report any issues related to sexual harassment

Financial and Legal Literacy

To be competent, the user/individual on the job must be able to:

PC9. use various financial products and services safely and securely

PC10. calculate income, expenses, savings etc.

PC11. approach the concerned authorities for any exploitation as per legal rights and laws

Essential Digital Skills

To be competent, the user/individual on the job must be able to:

PC12. operate digital devices and use its features and applications securely and safely

PC13. use internet and social media platforms securely and safely

Entrepreneurship

To be competent, the user/individual on the job must be able to:

PC14. identify and assess opportunities for potential business

PC15. identify sources for arranging money and associated financial and legal challenges

Customer Service

To be competent, the user/individual on the job must be able to:

PC16. identify different types of customers

PC17. identify customer needs and address them appropriately

PC18. follow appropriate hygiene and grooming standards

Getting ready for apprenticeship & Jobs

To be competent, the user/individual on the job must be able to:

PC19. create a basic biodata

PC20. search for suitable jobs and apply

PC21. identify and register apprenticeship opportunities as per requirement

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. need for employability skills

KU2. various constitutional and personal values

KU3. different environmentally sustainable practices and their importance

KU4. Twenty first (21st) century skills and their importance

KU5. how to use basic spoken English language

KU6. Do and dont of effective communication

KU7. inclusivity and its importance

KU8. different types of disabilities and appropriate communication and behaviour towards PwD

KU9. different types of financial products and services

KU10. how to compute income and expenses
KU11. importance of maintaining safety and security in financial transactions
KU12. different legal rights and laws
KU13. how to operate digital devices and applications safely and securely
KU14. ways to identify business opportunities
KU15. types of customers and their needs
KU16. how to apply for a job and prepare for an interview
KU17. apprenticeship scheme and the process of registering on apprenticeship portal

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. communicate effectively using appropriate language
GS2. behave politely and appropriately with all
GS3. perform basic calculations
GS4. solve problems effectively
GS5. be careful and attentive at work
GS6. use time effectively
GS7. maintain hygiene and sanitisation to avoid infection

Assessment Criteria

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
Introduction to Employability Skills	**1**	**1**	**-**	**-**
PC1. understand the significance of employability skills in meeting the job requirements	-	-	-	-
Constitutional values – Citizenship	**1**	**1**	**-**	**-**
PC2. identify constitutional values, civic rights, duties, personal values and ethics and environmentally sustainable practices	-	-	-	-
Becoming a Professional in the 21st Century	**1**	**3**	**-**	**-**
PC3. explain 21st Century Skills such as Self-Awareness, Behavior Skills, Positive attitude, self-motivation, problem-solving, creative thinking, time management, social and cultural awareness, emotional awareness, continuous learning mindset etc.	-	-	-	-
Basic English Skills	**2**	**3**	**-**	**-**
PC4. speak with others using some basic English phrases or sentences	-	-	-	-
Communication Skills	**1**	**1**	**-**	**-**
PC5. follow good manners while communicating with others	-	-	-	-
PC6. work with others in a team	-	-	-	-
Diversity & Inclusion	**1**	**1**	**-**	**-**
PC7. communicate and behave appropriately with all genders and PwD	-	-	-	-
PC8. report any issues related to sexual harassment	-	-	-	-
Financial and Legal Literacy	**3**	**4**	**-**	**-**
PC9. use various financial products and services safely and securely	-	-	-	-

Assessment Criteria for Outcomes	Theory Marks	Practical Marks	Project Marks	Viva Marks
PC10. calculate income, expenses, savings etc.	-	-	-	-
PC11. approach the concerned authorities for any exploitation as per legal rights and laws	-	-	-	-
Essential Digital Skills	**4**	**6**	**-**	**-**
PC12. operate digital devices and use its features and applications securely and safely	-	-	-	-
PC13. use internet and social media platforms securely and safely	-	-	-	-
Entrepreneurship	**3**	**5**	**-**	**-**
PC14. identify and assess opportunities for potential business	-	-	-	-
PC15. identify sources for arranging money and associated financial and legal challenges	-	-	-	-
Customer Service	**2**	**2**	**-**	**-**
PC16. identify different types of customers	-	-	-	-
PC17. identify customer needs and address them appropriately	-	-	-	-
PC18. follow appropriate hygiene and grooming standards	-	-	-	-
Getting ready for apprenticeship & Jobs	**1**	**3**	**-**	**-**
PC19. create a basic biodata	-	-	-	-
PC20. search for suitable jobs and apply	-	-	-	-
PC21. identify and register apprenticeship opportunities as per requirement	-	-	-	-

ICE/CON/N1519: Assist in Electrical Wiring Low Voltage (LV) Installations and Earthing systems

Description

This unit is about assisting in electrical wiring and installations at construction sites, focusing on low-voltage systems, basic wiring tasks and following instructions under supervision.

Scope

The scope covers the following :

- Prepare for electrical works
- Assist in wiring tasks
- Assist in LV installations
- Assist in testing
- Carry out post-installation tasks

Elements and Performance Criteria

Prepare the site for electrical system installation

To be competent, the user/individual on the job must be able to:

PC1. interpret basic site layout plans and identify wiring requirements under supervision

PC2. identify and organize tools, equipment, materials and PPE required for electrical wiring tasks

PC3. check the quality of wires, conduits, connectors and other components before use

PC4. clean and prepare work areas for safe wiring operations

Assist in wiring tasks

To be competent, the user/individual on the job must be able to:

PC5. assist in laying conduits and routing cables as per supervisor instructions

PC6. pass electrical wires through conduits, ensuring proper alignment and secure placement

PC7. position cables, trays and fixtures during installation as directed

PC8. assist in fixing wiring to junction boxes, panels and outlets using tools

PC9. follow standard color codes and markings for wire identification

PC10. support in securing and bundling cables for safety and organization

PC11. assist in basic wiring connections for lighting, appliances and switches

Assist in installations of LV system

To be competent, the user/individual on the job must be able to:

PC12. assist in the installation of low-voltage electrical circuits for lighting systems

PC13. assist in carrying out wiring for HVAC systems under supervision

PC14. connect wiring for standby generators following the safety guidelines and supervisor's instructions

Assist in Earthing System Installation

To be competent, the user/individual on the job must be able to:

PC15. assist in digging pits and laying earthing electrodes as per site specifications.
PC16. support in connecting earthing conductors to grounding rods, plates, or mesh.
PC17. ensure proper placement of earthing components to achieve minimum resistance.
PC18. assist in checking earthing continuity and effectiveness under supervision.

Assist in testing

To be competent, the user/individual on the job must be able to:

PC19. conduct basic insulation checks under supervision using tools like a multimeter
PC20. follow the applicable safety procedures while handling live wires and connecting wires to electrical panels
PC21. report any damaged wires, tools or components to the supervisor immediately

Carry out post-installation tasks

To be competent, the user/individual on the job must be able to:

PC22. assist in labelling and documenting wiring connections as required
PC23. clean the site by disposing waste materials in designated areas
PC24. store unused wiring and equipment in the proper storage areas

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. types of electrical systems commonly used at construction sites
KU2. components of electrical systems such as wires, conduits, junction boxes etc.
KU3. basics of low-voltage electrical wiring systems
KU4. wiring standards, including colour-coding and labelling conventions
KU5. common tools used for electrical wiring, e.g. wire strippers, cutters, crimping tools, etc.
KU6. handling and maintenance of tools and equipment
KU7. types and properties of wires, conduits, and fittings
KU8. use of relevant PPE for electrical tasks
KU9. hazards associated with electrical wiring and methods to mitigate risks
KU10. importance of grounding and earthing in electrical installations
KU11. principles of earthing, including types (plate earthing, rod earthing etc.).
KU12. components of an earthing system and their functions.
KU13. basic steps for assisting in electrical installations
KU14. techniques for organizing and routing cables efficiently
KU15. reporting procedures for damaged equipment or hazardous conditions

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. convey and interpret technical information, instructions and feedback with team members and supervisors

GS2. analyze work requirements, assess material suitability and choose the best tools, methods and techniques to meet project goals

GS3. record measurements, material usage and quality checks systematically to ensure accuracy and traceability

GS4. identify and address challenges, such as misaligned components or damaged materials, through appropriate solutions

GS5. collaborate with peers and supervisors to ensure smooth workflow and alignment with project objectives

GS6. prioritize tasks and efficiently manage resources to meet deadlines without compromising quality

GS7. maintain accuracy in measurements, alignment and finishing to meet design specifications and quality standards

GS8. adjust to changing requirements or unforeseen challenges, ensuring project continuity and compliance

GS9. foster positive working relationships and facilitate cooperation among team members for improved outcomes

GS10. promote and adhere to safety standards, ensuring a secure working environment for oneself and others

Assessment Criteria

ICE/CON/N1520: Assist in Installation, Repair and Maintenance of Electrical Systems

Description

This unit focuses on assisting in the installation and maintenance of temporary electrical setups at construction sites, including lighting systems and low-voltage electrical panels.

Scope

The scope covers the following :

- Prepare for temporary installations
- Assist in installations
- Maintain the temporary electrical systems
- Carry out post-installation and maintenance activities

Elements and Performance Criteria

Prepare for temporary installations

To be competent, the user/individual on the job must be able to:

PC1. assess site requirements for temporary electrical setups under supervisor guidance

PC2. identify tools and equipment needed for temporary lighting and panel installations

PC3. inspect lighting fixtures, cables and panels for functionality before installation

Assist in installation of electrical systems

To be competent, the user/individual on the job must be able to:

PC4. assist in laying cables for temporary lighting and power arrangements

PC5. position and hold fixtures, lights and panels during installation

PC6. assist in connecting temporary electrical panels to power sources like generators

PC7. route and secure cables to avoid tripping hazards or damage

PC8. assist in installing temporary lighting systems for pathways, work areas and emergency lighting

PC9. ensure proper grounding of temporary setups as instructed

PC10. follow supervisor instructions to balance power loads on temporary electrical panels

Perform repair and maintenance of the temporary electrical systems

To be competent, the user/individual on the job must be able to:

PC11. perform visual inspections of temporary lighting and power setups for damage

PC12. replace bulbs, switches, and sockets as instructed

PC13. check cables and connectors for wear and tear and report issues to the supervisor

PC14. assist in performing basic electrical tests like voltage and current check

PC15. isolate circuits safely before starting any maintenance tasks

Carry out post-installation and maintenance activities

To be competent, the user/individual on the job must be able to:

PC16. assist in disassembling temporary electrical setups once the work is completed
PC17. store cables, tools and components in the designated storage areas after use
PC18. document maintenance tasks and reported issues for reference

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

KU1. The purpose and components of temporary lighting systems
KU2. Their use of low-voltage electrical panels in construction setups
KU3. The importance of grounding and load balancing in temporary setups
KU4. The tools used for installing and maintaining temporary systems
KU5. The common issues in temporary setups and their troubleshooting methods
KU6. The techniques for testing electrical systems using basic tools
KU7. The hazards associated with temporary electrical setups and the appropriate safety measures
KU8. The importance of isolating circuits before maintenance
KU9. The protocols for handling live circuits safely
KU10. The processes of temporary lighting and panel installation
KU11. The procedures for maintaining and repairing temporary electrical setups

Generic Skills (GS)

User/individual on the job needs to know how to:

GS1. communicate effectively with team members and supervisors to understand and execute tasks
GS2. read and interpret technical documents, drawings, and schedules accurately
GS3. perform basic mathematical calculations required for measurements and material estimation
GS4. use the digital tools and software relevant to metal fabrication and reinforcement work
GS5. identify and resolve common operational issues during fabrication and installation processes
GS6. follow organizational safety protocols and use personal protective equipment (PPE) appropriately
GS7. plan and organize work efficiently to meet project timelines and quality standards
GS8. maintain tools, equipment and workspaces in a clean and operational condition
GS9. adapt to new technologies and methods in construction and fabrication
GS10. record and report work progress, materials used and any deviations to supervisors

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Awarding Body. Each Performance Criteria (PC)/ Element will be assigned marks proportional to its importance in NOS. AB will also lay down proportion of marks for Theory and Practical Skills for each PC/ Element.

2. The assessment of the knowledge part will be based on knowledge bank of questions created by Assessment Bodies subject to approval by AB.

3. Individual assessment agencies will create unique question papers for knowledge/theory part for assessment of candidates as per assessment criteria given below.

4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training center based on assessment criteria.

5. To pass the Qualification Pack, every trainee must score 70% on overall QP.

6. The Assessor shall check the outcome of the practices while evaluating the steps performed to achieve the outcome.

7. The trainee shall be provided with a chance to repeat the test to correct his procedures in case of

improper performance, with a deduction of marks for each iteration.

8. After the certain number of iterations as decided by AB the trainee is marked as fail, scoring zero marks for the procedure for the practical activity.

9. In case of successfully passing only certain number of NOS's, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack within the specified time frame set by AB.

10. Minimum duration of Assessment of each QP shall be 8hrs/batch (max. 30 candidates).

Minimum Aggregate Passing % at QP Level : 70

(**Please note**: Every Trainee should score a minimum aggregate passing percentage as specified above, to successfully clear the Qualification Pack assessment.)

Assessment Weightage
